

Environmental Policy

ARC Electrical Systems Ltd recognises that its activities have an impact on the environment and is committed to improving its environmental performance and minimising harmful effects through caring policies and effective management. The company accepts and acknowledges its obligations and responsibilities under legislation and guidance dealing with environmental issues that affect or arise in consequence of its business.

Commitments

A Greener and Cleaner Environment for All: We strive to create a sustainable environment for current and future generations.

Prevention of Pollution: We are dedicated to preventing pollution in all areas of our operations.

Continual Improvement: We maintain a programme of continual improvement in all our activities.

Legislative Compliance: We stay aware of and comply with all current and future environmental legislation.

Reduced Use of Natural Resources: We aim to reduce our consumption of natural resources.

Waste Minimisation and Recycling: We minimise waste and maximise recycling and reuse wherever possible.

Legal Responsibilities

Discharge of Legal Responsibilities: We ensure compliance with all relevant environmental legislation and regulations.

Monitoring and Recording: We have systems in place to monitor and record environmental incidents, emergencies, and complaints.

Environmental Targets and Objectives

Setting Targets: We set environmental targets and objectives for our business.

Regular Checks: These targets are checked through regular management and supervisory actions, as well as independent internal and third-party audits.

Employee Awareness and Training

Awareness Training: Our employees receive appropriate training to ensure they understand the importance of environmental protection and site care/cleanliness.

Recycling and Waste Disposal

Recycling and Reuse: We recycle and reuse materials where possible. When recycling is not possible, we ensure waste is disposed of responsibly in accordance with current guidelines and legislation.

Communication and Review

Policy Communication: This policy is communicated and made available to all company personnel, supply chain members, the public, and other interested third parties.

Defined Responsibilities: Responsibilities are clearly communicated by the Directors and defined within the Company Management System.

Continuous Review: The Company Management System is continuously reviewed for effectiveness and suitability by the Directors.
